

phase 2™ carb controller

a proven solution for carb control

description

Phase 2™ is a proprietary, natural ingredient derived from the white kidney bean. Phase 2™ is not a stimulant; it works by reducing the enzymatic digestion of dietary starches. Phase 2™ has been clinically shown to reduce the digestion and absorption of dietary starches by up to 66%.¹

benefits

Phase 2™ has been extensively studied; more than 14 clinical studies have been conducted in the past 15 years. Phase 2™ is a market leader, and has been used successfully in multiple products worldwide.

Phase 2™ white kidney bean extract has been reviewed by U.S. FDA to permit structure/function claims:

- "may reduce enzymatic digestion of dietary starch"
- "may assist in weight control when used with diet and exercise"

Additionally, Phase 2™ has a license from the Natural Health Products Directorate of Canada, in which the following uses are authorized:

- "at 6 capsules (3000 mg) per day: Assists in weight management when used with a program of reduced intake of dietary calories and increased physical activity."
- "at 4–6 capsules (2,000–3,000 mg) per day: Provides support for healthy glucose metabolism following a carbohydrate rich meal."

Phase 2™ has also been shown to have efficacy for pets. 88% of dogs in a multi-clinic study lost weight.²

These statements have not been approved by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

advantages

- supports weight management
- structure/function claims support
- solvent-free
- self-affirmed GRAS status
- made from U.S.-grown white kidney beans
- non-GMO

recommended dosage

500–1500 mg per starchy meal. The amount required to inhibit alpha amylase enzyme from breaking down starches will vary based on amount of carbohydrate ingested.

product safety

Phase 2™ is a natural extract with a good safety profile.

product form

Phase 2™ is sold as a powder and can be used in a variety of end formats.
